CPI ACADEMIC PROGRAMMES

Academic Programmes Through Recognized University Partnerships

Crawford Professionals Institute (CPI) provides access to selected academic programmes through its university affiliation and academic partnership arrangements with recognized universities in Uganda.

Our academic programmes are designed to provide learners with structured university-level education, professional competencies and opportunities for career progression. Depending on the programme, learners may pursue Certificate, Diploma, Bachelor's Degree and Postgraduate programmes.

EXAMINING & AWARDING BODY

TEAM University, Uganda

Where a programme is offered under the TEAM University arrangement, TEAM University is the academic institution responsible for the programme's academic governance, assessment/examinations, quality assurance and award of the relevant qualification, subject to the applicable university and regulatory requirements.

TEAM University is a private university licensed by the National Council for Higher Education (NCHE) and is mandated to offer undergraduate, postgraduate and other approved programmes.

CPI'S ROLE

CPI serves as the professional training and student-support platform through which learners can receive guidance, professional training, application support, learning support and other services applicable to the programme.

CPI does **not** independently represent itself as the awarding university. The academic qualification is awarded by the **respective university responsible for that programme**, in accordance with its academic regulations and applicable regulatory requirements.

PROGRAMME CATEGORIES

Certificate Programmes

Foundation-level academic and professional programmes designed to develop essential knowledge and practical competencies.

Diploma Programmes

Programmes providing more advanced theoretical knowledge and practical professional skills for employment, career development or further academic progression.

Bachelor's Degree Programmes

University degree programmes designed to develop advanced academic knowledge, professional competence, analytical ability and career readiness.

Postgraduate Programmes

Advanced programmes for graduates and professionals seeking specialization, career advancement or further academic development.

IMPORTANT

Programme availability, admission requirements, duration, fees, mode of study, examination arrangements, university affiliation and awarding arrangements may vary from one programme to another.

Applicants should always confirm the specific programme, awarding university and applicable regulatory status before enrolment.
